

**AMENDMENT TO THE SPECIFICATION**

Please delete the figure on page 68 of the Substitute Specification.

Please replace the first full paragraph on page 68 with the following amended paragraph.

Fig. 1[[[:]]] illustrates a separation of the fluorocarbon emulsions in fractions as a function of the production method: A according to the prototype (the emulsion contains free phospholipids), B according to the method according to this invention (the emulsion contains only particles of a different size). 1, 2, 3 mean the upper, middle and lower fraction. 1a means the free phospholipids in the upper fraction.
